Security Failover Technology for Cyber-attack Recovery That Redefines The Very Essence of ICS & OT Resilience

Innovative Solutions to minimize downtime and enable recovery from any disk failure.

We provide our customers the security of all-in-one data recovery tools, air-gapped data protection, innovative recovery software, and dramatic improvement in recovery time objective (RTO) – to ensure our customers an excessive save in time and money!

Our service includes:

- ✓ Full recovery from cyber-attacks and IT failures
- ✓ 30-second recovery agnostic to disk size
- ✓ Easy and swift installation- Less than one minute!
- ✓ Fully automated recovery process
- ✓ Offline protection for user's backup data (air gap)

- ✓ Full visibility through a single-point monitoring system
- ✓ Recovery of software data and full OS configurations

Critical Infrastructures

Energy
